

# **Benchmarkchart – php example code – part 3 – admin page**

**Article describe admin page for removing unwanted score with remove.php script. Remove script is invoked by GET url link, then create verification form and submit data for deletion with POST method.**

Admin page show all submited score in form of a table. But against way used in index page, there is every row displayed a second row with Manage content leading text and ling for a removal script.

Better way for understanding can be gain after looking on next picture

## 3dmark results chart v 1.0 - admin section

→ return to main score page

### Administration of benchmark result posts

id	score	nickname	date of post	screenshot
19	12636	maximus636	2020-10-03 18:06:31	
Manage content:		DEL - Remove score		
18	11995	zonerrs555	2020-10-03 18:02:47	
Manage content:		DEL - Remove score

Manage content:		DEL - Remove score		

admin.page content

Code that read data from database table and create this table output is as follows

```

<?php // code showing all subscribers in form of a table at en
d of the page

$dbc = mysqli_connect(DB_HOST, DB_USER, DB_PW, DB_NAME);

// Check connection
if($dbc === false){
    die(„ERROR: Could not connect to database – stage of artic
le listing. “ . mysqli_connect_error());
}

// read all rows (data) from guestbook table in „test“ databas
e
$sql = „SELECT * FROM benchmark_chart ORDER BY score DESC“; /
/ read in reverse order of score – highest score first
/****************/
*****/
/*          Output in Table – solution 1 – for debugging data
from database          */
/****************/
*****/
// if data properly selected from guestbook database tabele

echo „<h4>Administration of benchmark result posts</h4>“;

## remove.php script

Remove.php script gather data from GET post (link created by admin page pass GET data into a remove.php script). This script obtain GET data and create internal form for verification of a removal score. This form is next submitted with POST send on themself. But not as self script but calling script name without GET url link (no further GET data need to be obtained again).

After confirmation and setting **Yes** for deletion, POST data are used for database deletion and removing of submitid score picture located in images folder.

GUI of confirmation looks like this

3dmark results chart v 1.0 - part for selected score removal

→ return to main score page

Confirmation of deletion selected score script.

Are you sure to delete the next highscore?

ID: 18  
Nickname: zonerrs555  
Date: 2020-10-03 18:02:47  
Score: 11995

Yes  No

**SUBMIT**

After sending **Yes** or **No** for deletion, there will be shown two different outputs.

3dmark results chart v 1.0 - part for selected score removal

→ return to main score page

### Confirmation of deletion selected score script.

Please specify any highscore for removal.

The highscore was not removed.

<< Back to admin page.

Output after choosing No in confirmation page

3dmark results chart v 1.0 - part for selected score removal

→ return to main score page

### Confirmation of deletion selected score script.

Please specify any highscore for removal.

The highscore of **4427** for **yoast2** was successfully removed.

[<< Back to admin page.](#)

Output after choosing Yes in confirmation page – with further verification data of successful operation

All output pages contain link for return on a admin.php.

### Full code location

Full code of application with all updates can be obtained from github [here](#).
