

# Benchmarkchart – php example code – part 3 – admin page

Article describe admin page for removing unwanted score with remove.php script. Remove script is invoked by GET url link, then create verification form and submit data for deletion with POST method.

Admin page show all submitted score in form of a table. But against way used in index page, there is every row displayed a second row with Manage content leading text and link for a removal script.

Better way for understanding can be gain after looking on next picture

## 3dmark results chart v 1.0 - admin section

→ return to main score page

### Administration of benchmark result posts

| id              | score | nickname      | date of post           | screenshot |

    } else{
        echo „There is no benchmark result in chart. Please write one.“; // if no records in table
    }
} else{
    echo „ERROR: Could not able to execute $sql. “ . mysqli_error($dbc); // if database query problem
}
// Close connection
mysqli_close($dbc);
?>

```

Content of whole admin page can be obtained from github [here](#).

## remove.php script

Remove.php script gather data from GET post (link created by admin page pass GET data into a remove.php script). This script obtain GET data and create internal form for verification of a removal score. This form is next submitted with POST send on themselves. But not as self script but calling script name without GET url link (no further GET data need to be obtained again).

After confirmation and setting **Yes** for deletion, POST data are used for database deletion and removing of submitted score picture located in images folder.

GUI of confirmation looks like this

Confirmation of deletion selected score script.

Are you sure to delete the next highscore?

ID: 18

After sending **Yes** or **No** for deletion, there will be shown two different outputs.

3dmark results chart v 1.0 - part for selected score removal

→ return to main score page

Confirmation of deletion selected score script.

Please specify any highscore for removal.

The highscore was not removed.

<< Back to admin page.

Output after chosing No in confirmation page

3dmark results chart v 1.0 - part for selected score removal

→ return to main score page

Confirmation of deletion selected score script.

Please specify any highscore for removal.

The highscore of **4427** for **yoast2** was succesfully removed.

<< Back to admin page.

Output after chosing Yes in confirmation page – with further verification data of succesfull operation

All output pages contain link for return on a admin.php.
